Agenda.

- Booking.com 概况
- MySQL数据构架
 - 自动化案例分析
- 数据库HA高可用性解决方案
- 测试环境搭建

Booking.com.

- Booking.com于1996年成立于荷兰阿姆斯特丹,现在是全球最大的在线酒店预订网站。目前隶属于Booking Holdings Inc (Booking.com, Agoda, priceline.com, Kayak, RentalCars, OpenTable)
- 拥有超过1.5万名员工,就职于全世界70个国家及 地区的198家办公室
- Booking. com的网站和移动端App支持40余种语言, 网站注册房源总数超过28,469,348, 遍布全球229 个国家及地区的 131,481个目的地
- 日均客房预订间夜数超过1,550,000
- Booking. com使用MySQL做为主要的线上数据库解决方案,目前是欧洲最大的MySQL用户

MySQL

Thousands of MySQL baremetal servers

Hundreds of Replication chains (master - slave)

Several data centers for redundancy

MySQL 5.6, 5.7, 8.0 & MariaDB

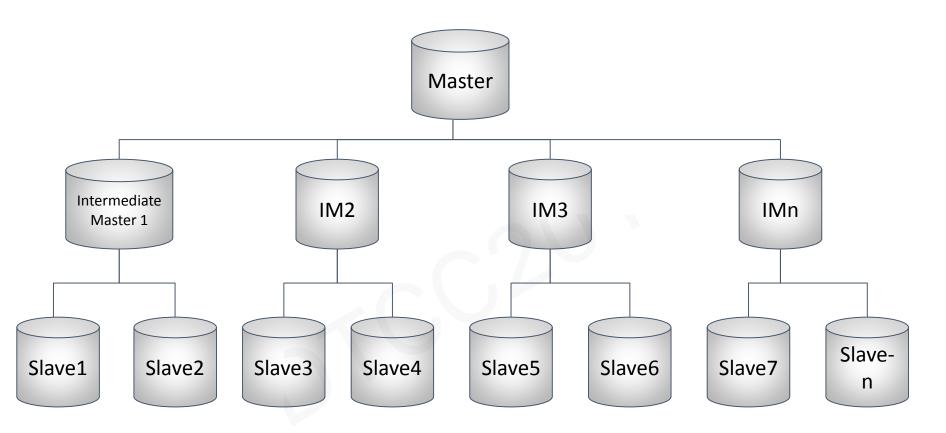

Standard Replication Chain.

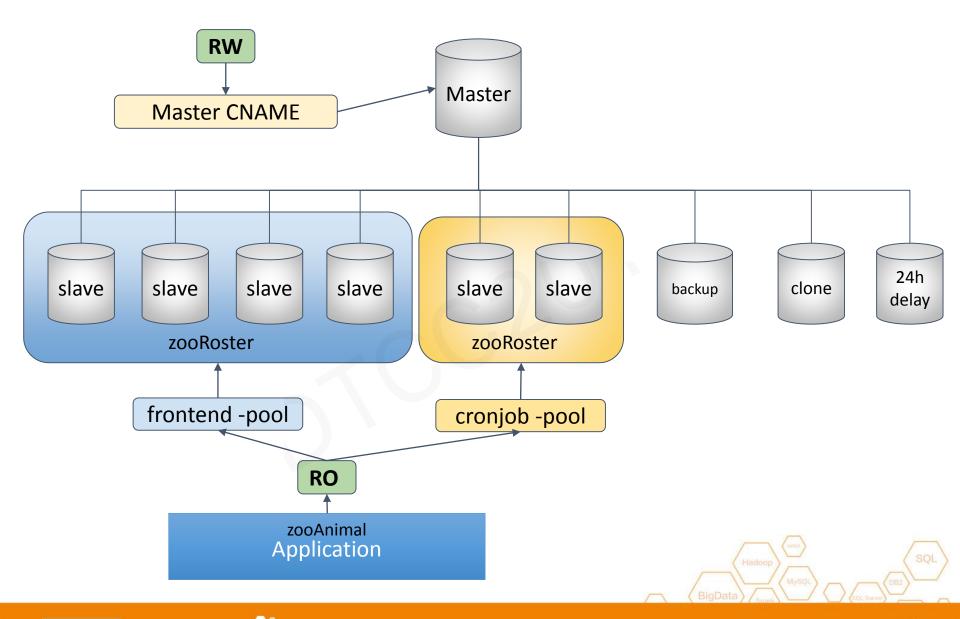

Automation.

- Auto upgrade MySQL/MariaDB 数据库版本升级
- Auto upgrade OS 自动操作系统升级
- Auto execute tasks 指定任务执行
- Auto grow/shrink pool 自动扩展和收缩服务器池
- Auto schema changes 自动执行DDL 表结构改变语句
- Backup/Restore 自动数据备份和恢复

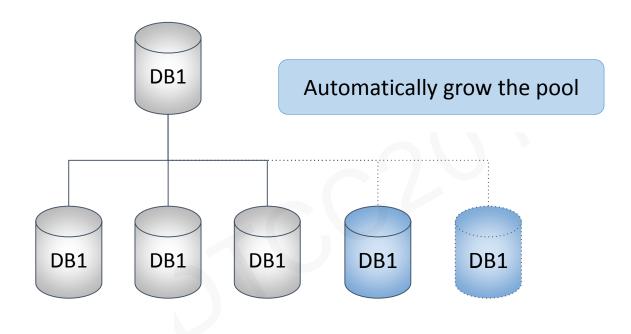

How to scale read.

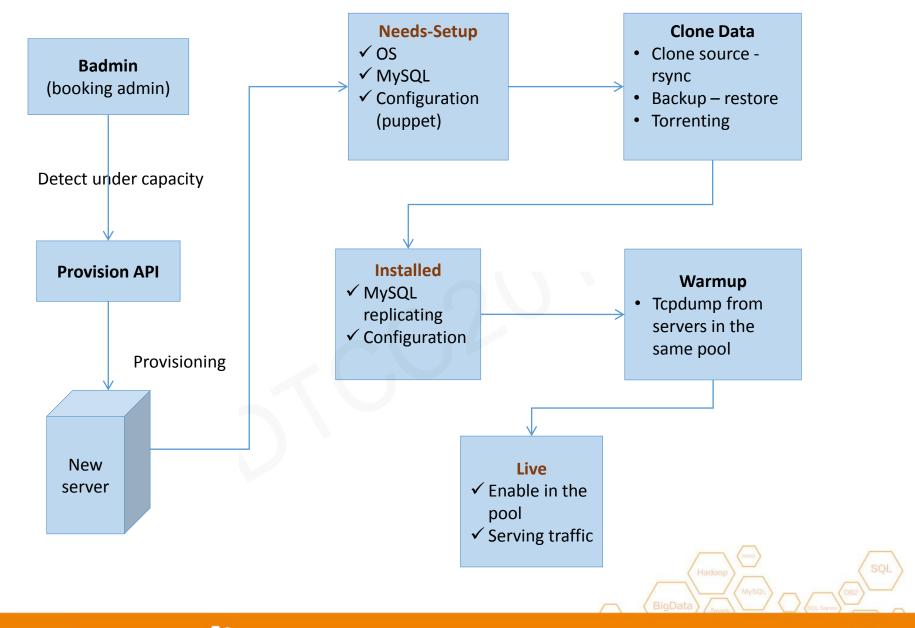

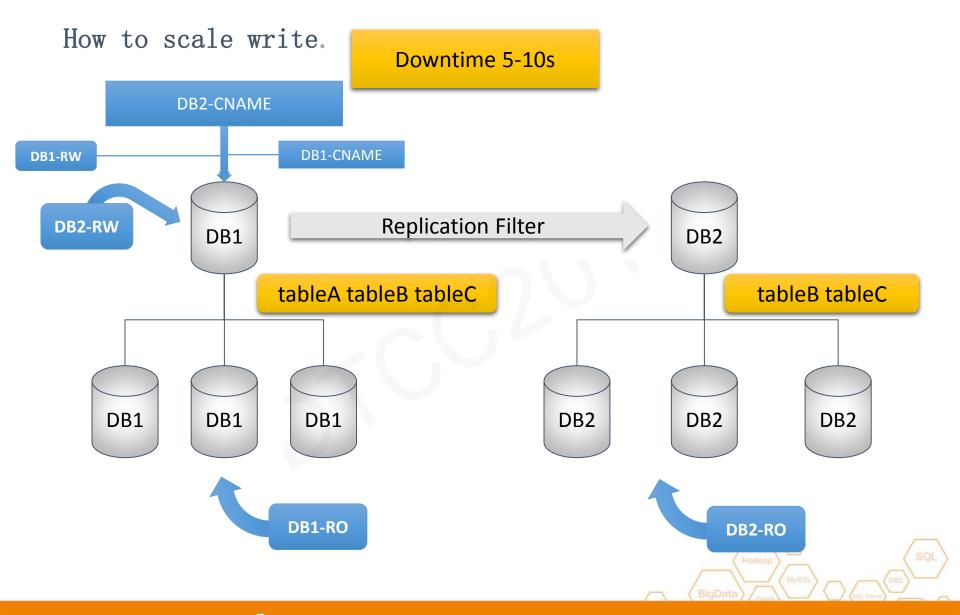

HA solution - Orchestrator.

- What is orchestrator
- What failure does it handle
- Demo

What is orchestrator

Orchestrator is a MySQL replication topology management and visualization tool, allowing for:

- Detection and investigation of replication clusters
- Safe topology refactoring: moving replicas around the topology
- Sleek topology visualization
- Replication problems visualization
- Topology changes via intuitive drag & drop
- Maintenance mode declaration and enforcement
- Auditing of operations
- More...

Developed by Shlomi Noach.

https://github.com/github/orchestrator

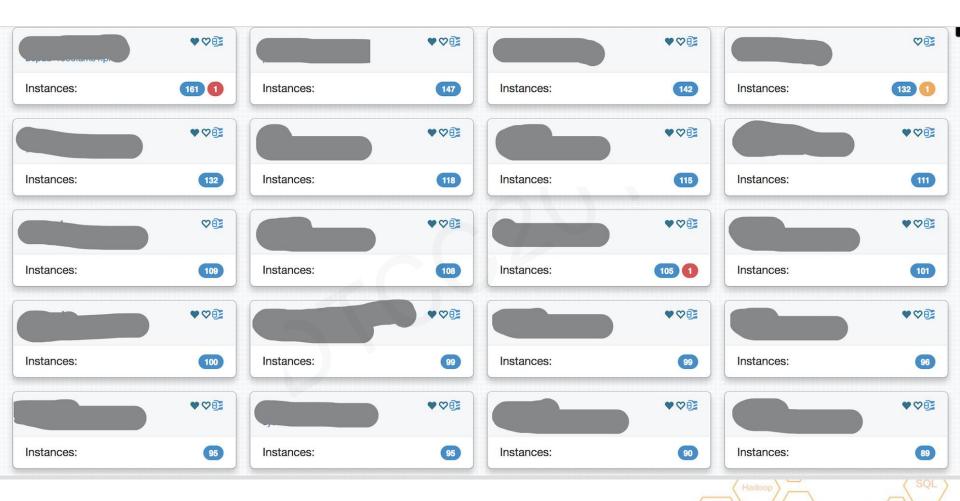

Orchestrator GUI

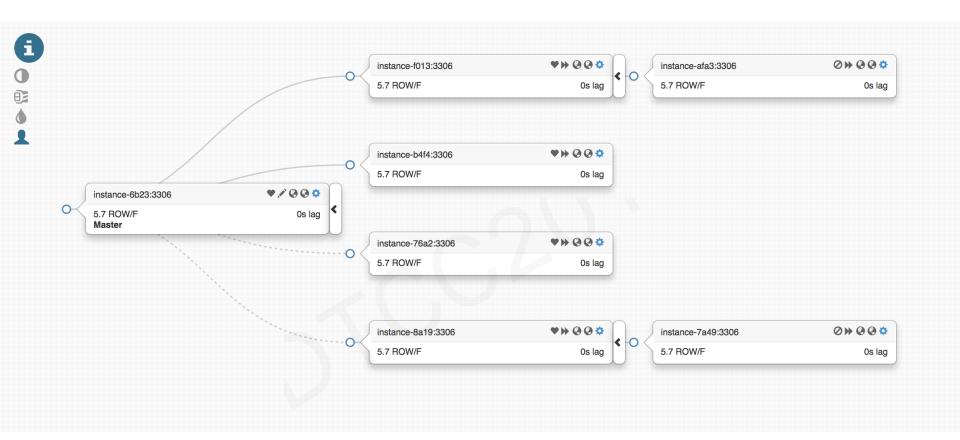

Orchestrator GUI

What failures does it handle

- Master failures
 - Operational hooks to external systems which need to be aware of these faulure
- Intermediate master failures
- Does **NOT** care about leaf slaves or applications
- Works with Oracle or MariaDB GTID
- Works without GTID: Can add pseudo-GTID (events injected on the master are used to find a match) so no need to migrate
- Handles multi-level topologies

Test Environment.

- Database testing environment is shared with everyone
- Database instances are running on VM
- All production data
- Data refresh everyday

关注"ITPUB"更多 技术干货等你来拿~

与百度外卖、京东、魅族等先后合作系列分享活动

让学习更简单

微学堂是以ChinaUnix、ITPUB所组建的微信群为载体,定期邀请嘉宾对热点话题、技术难题、新产品发布等进行移动端的在线直播活动。

截至目前,累计举办活动期数60+,参与人次40000+。

■ ITPUB学院

ITPUB学院是盛拓传媒IT168企业事业部(ITPUB)旗下 企业级在线学习咨询平台 历经18年技术社区平台发展 汇聚5000万技术用户 紧随企业一线IT技术需求 打造全方式技术培训与技术咨询服务 提供包括企业应用方案培训咨询(包括企业内训) 个人实战技能培训(包括认证培训) 在内的全方位IT技术培训咨询服务

ITPUB学院讲师均来自于企业
一些工程师、架构师、技术经理和CTO
大会演讲专家1800+
社区版主和博客专家500+

培训特色

无限次免费播放 随时随地在线观看 碎片化时间集中学习 聚焦知识点详细解读 讲师在线答疑 强大的技术人脉圈

八大课程体系

基础架构设计与建设 大数据平台 应用架构设计与开发 系统运维与数据库 传统企业数字化转型 人工智能 区块链 移动开发与SEO
